## **MEINL PERCUSSION INTRODUCES TWO STRING DESIGNER CAJONS**

With the two new String Designer Cajons, Meinl percussion introduces a fresh and stylish appeal for these popular instruments. Organic, fluid graphics take the cajons away from the “boxy-crate” look, and move them towards elegance.

With the frontplate crafted from Tulip wood (*Dalbergia variabilis*) and the resonating body made from eco-friendly fibreboard, the new Meinl cajons are also equipped with an adjustable sizzle effect and an integrated sting mute system (U.S. patent).
