## INTRODUCING THE NEW MEINL CLAMSHELL SPARK SHAKERS

Invented by Meinl Percussion's mastermind Bill Saragosa, the company introduces the two new innovative Clamshell Spark Shakers.

The two halves are held together like a hinge by a single solid weld. The sparkling, chirping, splashing tones of the new Clamshell Spark Shakers readily mix with any musical flavour. Their pod-like shape fits easily into the hand and when squeezed together, a widely variable pitch response can be achieved.

The Meinl Clamshell Spark Shakers come in two pitches for a high-low combination and can be played in combination with other shakers for even more variations.

Inventor Bill Saragosa

<b>Material</b>	Steel
<b>Features</b>	Comes in a set of two Widely variable pitch response
<b>Finish</b>	Black nickel
