ARTISAN EDITION CAJONS

JOSÉ HERNÁNDEZ DÍAZ

also known as 'Pepote' – was born in Huelva (Spain) in November 1976. He inherited his passion for wood from his father and grandfather, both of whom were aficionados of woodwork and model aeroplanes.

He first came across the Cajon at the age of 13 while watching a Paco de Lucia concert on television. Inspired to make his own, he soon started receiving commissions from friends and acquaintances when they realised that the Cajon was virtually impossible to get hold of in Spain.

Pepote began taking these instruments to local shops in his city when he was just 15 years old. This marked the start of his woodwork training, where he focused on the production of musical instruments by studying techniques for making ancient musical instruments and guitars while also completing his studies in industrial furniture design.

Since then, he has been continually developing the instrument and relentlessly perfecting his craft. He came up with an aesthetic based on comfort, tried and tested more than 30 different kinds of wood for construction, created a special unbreakable string for the Cajon and tried 20 different kinds of varnish for the finish. The list goes on. Everything he does revolves around getting the best possible sound out of the instrument and providing the ultimate peace of mind for the percussionist.

Sometimes a Drum Circle is a big party, sometimes it's more like a ceremony, and other times it's orientated to a specific goal or message. The Drum Circle is a very adaptable technology to meet a broad spectrum of social purpose. For many people it is an initiation into a new level of self and group awareness. It definitely gets us moving!

No matter who we are, the call of the drum has the potential to elevate our human experience and people's lives become better because of that. Facilitating Rhythm Circles is an honor, a privilege, and also a responsibility. It is a fascinating and rewarding commitment.

Rhythm is a way of Life. [Bill Saragosa]

Learning to play an instrument and making music are life-changing things to do, especially for children.

Starting this in early childhood nurtures many things including perception, motor skills and the ability to learn and retain information. Making music also promotes personal confidence and social skills. These are all beneficial well beyond one's childhood years.

NINO® Percussion offers an outstanding collection of musical instruments designed specifically for children. These more than meet the requirements of early childhood music education and are ideal for kindergarten and school programs, or for music therapy and other music-making activities.

It is important to know that NINO® Percussion instruments are not toys. These are the real thing, designed for safety, durability, attractiveness and playability. Most importantly, they are in tune and musical. In fact, the only difference between NINO® Percussion instruments and those created for adults is their size and colour.

These appealing and pleasing designs are of a very high quality and include a wide variety of sound choices, making them popular with young players, as well as teachers and parents. Whether played alone or with a group, the performance and sound quality of NINO® Percussion instruments make them the ideal choice for young musicians and those who teach them.

HOW TO PLAY

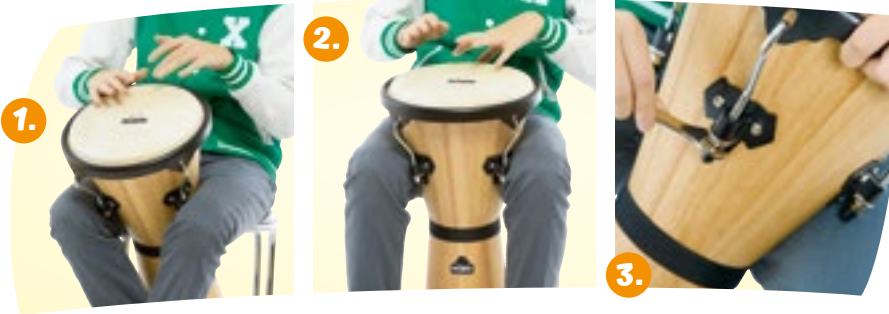

CAJONS

1. Leaning over and hitting the cajon with your palm toward the middle of the front plate will produce a low end tone.
2. Slapping the cajon on the side or near the top will produce a high pitched tone.
3. Use your foot for a special playing technique.
4. Tilting the cajon makes it more comfortable on your back and wrists.

DJEMBES

1. Place the djembe between your legs, crossing your ankles in front of you for support. Keeping your hands relaxed, strike the head of the drum near the edge for strong open and slap tones. Striking the drum in the middle will produce a powerful bass tone.
2. Alternating between your right and left hands, create your own patterns and rhythms.
3. Tune the djembe by using the provided tuning wrench to create a higher or lower sound.

BONGOS

1. Traditionally, you play the bongo between your legs with the smaller drum on your left. A slap tone is produced by cupping your fingers slightly as you strike the head of the bongo.
2. To create an open tone, strike near the edge of the bongo head with the length of your fingers in a loose slapping motion, letting your fingers bounce as you make contact with the drum.

CONGAS

1. Keeping your hands relaxed, strike the head of the conga near the edge for strong open and slap tones. Striking the drum in the middle will produce a powerful bass tone.
2. Use the two congas together to create fun rhythmic and melodic patterns.
3. Tune the conga by using the provided tuning wrench to create a higher or lower sound.

SEA DRUMS

1. Hold the sea drum horizontally and turn the drum slowly to create the sound of waves flowing in the sea.
2. Striking the sea drum in a horizontal position will create a crashing waves sound.
3. Holding the drum vertical and striking the heads will create a more traditional drum sound with some added rattle for a variety of interesting effects.

Meinl Sonic Energy is a collection of instruments that supports our connection to experience the body, mind and energy, as One. Many practitioners and guides within the health and wellness industry use these instruments therapeutically for stress management, anxiety relief, insomnia, depression, addictive recovery, pain management, etc. They are unique expressions of the vibrations we encounter on a daily basis and when listened to closely, seem to have a language all their own. They invite us to appreciate the definition of all things we find harmonious in our life and through this support, our journey begins toward new peace and restoration. Our collection of beautifully crafted creations makes self-discovery through sound a simple, profound practice.
